4. I'm wearing a jacket at the moment. ....
5. I went swimming yesterday. ....
6. I haven't been to England. ....

# Reading test

**1 Read this blog extract. Are the statements true (T), false (F) or not mentioned (NM)?**

It's a well-known fact. People go to hospitals to get well. If you are ill, you go to hospital and the doctors and nurses do everything they can to make you well again. Perhaps you've had an operation or perhaps you need special medicine or treatment. Whatever the problem, the idea is that hospitals help you to become healthier. The problem is that in the UK, this is not exactly true! The medical help is excellent but the food isn't! Patients eat meals that are not very healthy at all. This is especially true in children's hospitals. I know this because my daughter, Maggie, had to stay in hospital for three weeks last month. I was amazed at her meals. She had chips, burgers, pizzas, ice cream and jelly. How healthy is that? Doctors tell us NOT to eat things like that and to eat lots of fruit and vegetables. Maggie didn't even see a fresh vegetable for the first week. It seems that I am not the only one who is worried about the food in hospitals. One of the top chefs in England thinks the same. Heston Blumenthal is a famous TV chef and he has some excellent restaurants. He makes amazing food. He uses scientific methods to produce very imaginative meals. Well, he decided to try to persuade the chefs in hospital kitchens to change the menus. The chefs say that their job is to encourage sick children to eat. They think that it's better for children to eat unhealthy food than to eat nothing. Heston thinks there is a way to make healthy food interesting for children. So he started a project to try a new menu. Lucky for Maggie he started in her hospital! In her second week she ate Heston's food and she says it was wonderful! He was very clever and used fruit and vegetables in unusual ways. There was ice cream made from sweet vegetables and lollipops from fruit. The food looked and tasted delicious, so of course the children wanted to eat it. There's going to be a TV programme about this project – so watch it if you can, it will be interesting!

- 1 Doctors in the UK aren't very good. \_\_\_\_
- 2 Children are served junk food in hospitals in the UK. \_\_\_\_
- 3 The writer's daughter had an operation last month. \_\_\_\_
- 4 Heston Blumenthal is a famous scientist. \_\_\_\_
- 5 Children get better eating unhealthy food. \_\_\_\_
